——refractories (O) 185, 568
Magnesium hydroxide, furnace linings with (A) 765
——preparation of—oxide (A) 1004
——process of separating—from dolomite (P) 690
Marl, treatment of greensand—and glauconite (P) 79
Melting-point methods at high temperatures (A) 326
Metal technic and ceramics (A) 515
Mica in 1919 (A) 502
——schist for lining cupolas and steel-converters (A) 415
——in terra cotta slips (O) 114
Mixer, mechanical—and drier (A) 764
Molding plastic materials (P) 679
Molds, used plaster (A) 576
Mortars, fire clay, use of in laying clay brick (A) 330
——measurement of plasticity of—and plasters (A) 775
Mosaic and enamels of the vatican (A) 593

N

Nickel oxide, colors produced by—glazes (O) 663

O

Oil, an efficient—burner (A) 678
——firing of kilns (O) 842
Osmosis, electro-osmotic in ceramics (A) .. 845
——osmotic purification of clay (A) 329
——purifying clays by electrical (A) 1001
Oven, glass-annealing (P) 86
Oxychloride, magnesium—cement (P) 520

P

Paper, kaolin as a filler for (A) 577
Paving (A) 857
Peat, use of—in glass industry (A) 591
Phonolite in glass manufacture (A) 930
——used in green bottle glass (A) 926
Plaster board (P) 776
——board, making (P) 776
Plasters, colored (P) 857
——popping (unsoundness) of lime (O) 877
——the setting of (A) 173
——measurement of plasticity of mortars and (A) 775
Plasticity, measurement of—of mortars and plasters (A) 775
——new facts about surface friction (A) ... 1001
Polariscope, application of, to the glass industry (A) 584
Porcelain bodies, preparation of (A) 428
——bodies for spark plug insulators (A) .. 340
——casting of (A) 770
——cement (P) 1011
——cement for (A) 922
——defective ware in casting (A) 596
——dental—filling (A) 922
——Dressler tunnel kiln in the manufacture of semi- (O) 460
——dust question in—industry (A) 596
——effect of time and temperature of burning on (O) 978
——English china clay for hard (A) 597
——glass-like, fusible (A) 339
——glass pot mixtures (O) 569
——token money (A) 855
——various problems in—industry (A) 598

——vitrification of—molded under different conditions (O) 837
Potassium, recovery of—and aluminum from greensand (P) 79
——treating—bearing silicates (P) 79
Pottery, base for supporting molded plastic articles (P) 170
——casting of (A) 599
——casting of heavy (A) 430
——charging and drawing of potters' ovens (A) 170
——classes at Camberwell (A) 516
——feldspar as a—material (A) 341
——German—factories (A) 514
——manufacture, losses in (A) 342
——making in Japan (A) 598
——Nigerian (A) 431
——pulldown for potteries (P) 343
——recent achievements in—casting (A) .. 680
——truck superstruction for sanitary ware (P) 516
——American raw materials in white ware —(O) 134, 997
Potash deposits of Germany (A) 762
Powdered-fuel, science of—combustion (A). 1001
Producer gas, fuels and gas producers in the glass industry (A) 930
——as fuel for the glass industry (O) 918
Pug mill control (O) 388
——knife (P) 763
Purification, osmotic—of clay (A) 329

Q

Quebec, mineral production in (A) 579

R

Refractivity, chemical composition and—in optical glasses (O) 783
Refractories, boiler arch and wall (P) 766
——bricks, defects in refractory (A) 330
——British fire clays for glass furnace refractory materials (A) 924
——ceramic composition (P) 583
——coke oven walls, the corrosion of (A) 415, 690
——corrosive action of flue dust on fire-bricks (A) 166
——crucible graphite (A) 331
——for electric furnaces (A) 1003
——failure of fire clay (O) 448
——fire clay, use of, in laying fire clay brick (A) 330
——furnace for testing fire brick under load at high temperatures (A) 162
——for glass furnaces and melting walls (A) 765
——for the glass industry (A) 851
——for glasswork's use (A) 332
——graphite industry in Alabama (A) 505
——graphite industry during 1919 (A) 504
——graphite in Quebec, Canada (A) 504
——light weight (A) 765
——load behavior of aluminous—(O) 155
——magnesite (O) 185, 568
——magnesite in 1919 (A) 505
——magnesite as raw material (A) 161
——the malinite process for the production of sillimanite—(O) 40
——Nova Scotia fire clays (A) 80
——preservation of glass furnace—by water-cooling (A) 685
——preventable defects in refractory bricks (A) 602
——refractory cement (A) 416
——refractory materials (A) 333
——refractory materials, standardization of tests for (A) 334
——reversible expansion of refractory materials (A) 80
——shrinking magnesia (P) 924
——silica bricks, factors influencing the properties of (A) 335
——silica and other refractory bricks (A) .. 162
——silica brick from roof of a basic open-hearth furnace (A) 336
——sintered dolomite (A) 924
——specific heat of refractory materials at high temperatures (A) 80
——study of silica products (A) 164
——standardization of tests for refractory materials (A) 167
——Swansea district, science in relation to the industries of (A) 166
——tensile strength of refractory materials (A) 923
——tests on (A) 582
——tests of machine-made and hand-made silica brick (A) 80
——zinc furnace (A) 414
——in the zinc industry (A) 81
Refractory arch construction (P) 691
——article (P) 766
——cement (P) 82, 690
——composition (P) 167
——compounds (P) 417
——fire-bricks and—linings (P) 1005
——light-weight—brick (P) 766
——lining (P) 416
——material (P) 416, 1004
——materials for chemical purposes (A) .. 1003
——materials, reversible expansion of (A). 581
——materials of South Wales (A) 166
——mortar (A) 334
——muffles (A) 504
——product problems (A) 163
——substances (P) 851
Research associations in England (A) 327
——industrial at the Melion Institute (A). 329
Resistance-element, non-metallic (P) 849
Retorts and furnaces, lining (P) 851
——microstructure of (A) 415
——zinc (A) 580
Rheostat (P) 85

S

Sagger, high temperature—mixtures (O) .. 543
——producing (A) 599
——siliceous sagger mixtures (O) 69
——ware-support for ceramic firing (P) 579
Sand drying plant (P) 770
——grading apparatus for glass grinding machinery (P) 687
——lime brick, street paving with (A) 773
——and slime separator (P) 854
——supplying and grading—to glass-grinding machines (P) 689
Sanitary ware, truck superstruction for (P). 516
Scumming, barium hydrate in terra cotta (O) 313
Separator, air (A) 77
Silica bricks, factors influencing the properties of (A) 335
——brick from the roof of an open-hearth furnace (A) 336, 413
——brick, tests of machine-made and hand-made (A) 80
——determination of (A) 502
——materials, experiments on (A) 413
——melting-point diagram of the system zirconia—(O) 634

——products, guide for manufacturers of (A) 414
——and other refractory bricks (A) 162
——study of—products (A) 164
Silicates, constitutional formula of kaolin and other—(A) 158
——treating (A) 763
Siliceous rocks (A) 580
Sillimanite, commercial synthesis of (A) .. 762
——load behavior of aluminous refractories (O) 155
——the malinite process for the production of—refractories (O) 40
Slag brick (A) 601
——casting (P) 939
——foam—brick (A) 938
——tests with iron blast furnace (A) 1013
Slips, terra cotta (O) 114
——viscosity of a casting—(O) 286
Soap from clay (A) 330
Soapstone, talc and—in 1918 (A) 579
——talc and—in 1919 (A) 502
Sound-record (P) 79
Spark-plug, bodies for—insulators (A) 340
——cements for—electrodes (A) 345
Specific heat of refractory materials at high temperatures (A) 80
Stone, artificial (P) 850
——artificial—for roofing (P) 604
Stoneware, cleaning—clays (A) 514
——floor tile (A) 516
——standardization of chemical (A) 174
Striae, characteristics of—in optical glass (A) 591

T

Tableware, support for—during firing (P) .. 516
Talc and soapstone in 1918 (A) 579
——and soapstone in 1919 (A) 502
——in South Africa (A) 1001
Tensile strength of refractory materials (A). 923
Terra cotta, barium hydrate in (O) 313
——development of—glazes (O) 13
——grog in—bodies (O) 384
——influence of grog in admixture with clay (A) 691
——kiln gases and their effect on—glazes (O) 476
——size of grog grain in—body (O) 641
——slips (O) 114
Testing, automatic apparatus for intermittent (A) 762
Tile fungus (A) 935
——press (P) 78
——rough—for walks (A) 432
——stoneware floor (A) 516
——standard brick and—in France (A) ... 517
Tin oxide, substitutes for—in glazes (O) ... 6
——transverse strength of fire clay (A) 850
Titanium enamels (O) 316
Transverse strength, high-temperature—test (O) 543

U

Uranium, vermilion color from (O) 913

V

Volumeter, direct reading overflow (O) 730
Viscosity, measuring the—of pot made glass (O) 735

W

Water-glass, increasing the volume of (A) .. 337
Water purification (P) 159
Whiteware, American raw materials in (O) 134, 997
——bodies, preparation of (A) 428
——mechanical properties of ceramic bodies (A) 855
——pitfalls in body making (A) 680

Z

Zinc industry, refractories in the (A) 81
Zirconium, analysis of—materials (A) 690
——determination of (A) 1004
——investigations on (A) 765
Zirconia, melting point diagram of the system—silica (O) 634
——its occurrence and application (A) 167
——process of separating and extracting—oxide (P) 690
Zirkite, resistance of—to slag corrosion (A) 689
